Documentation for Fuel Tax Maintenance is in the Jobber Manual under Master File Maintenance, Fuel Taxes, Fuel Tax Add and Change.

3. <u>Tax Authority Code</u> - this brings all codes within a jurisdiction into one record. The easiest way to set one up is to display a similar Tax Authority. For example, if you are setting up another county in GA, display FULTON.. Use the 'COPY' option to create a record for the new county. Then replace the 'Fulton County' codes with the sales tax and fuel tax codes for the new county that you just set up.

Select line '2' and enter the Sales Tax Code entered in AR (87 in the example above). The new tax code and rate will display.

Select line '10' and replace with the new Laurens County Diesel PPD code.

Scan to the next screen and replace line '14' and '21' with the new Laurens County tax codes.

Scan through the entire record to make sure that all 'Fulton' tax codes have been replaced with 'Laurens' tax codes.

4. Territory Code

Jobber Master File Maintenance Territory Add Change Delete Territory

Territory	87	0			
Name	LAUR	ENS COU	INTY		
C dia	New	Next	Prev	Delete	Exit

Enter a Territory code and name as shown above.

NOTE: If you are setting up a Tax Authority for a new State, use the NY or MS tax authority to copy. These will have fewer codes that might need to be deleted.

CUSTOMER RECORD SET UP

Now set up the customer and enter the new Territory code in the 'Territory' field on the first screen. Go to the 'Tax' screen and enter the new Tax Authority Code in the 'Authcode' field.

Enter any exemption codes that apply if this customer has above ground tanks or is a permitted reseller.
